2017 The Wish Year in Review Coral & Royal Blue

During 2017 you would have been given opportunities to make wishes, set desires and intentions for a different way to present your talents in your chosen field of work. You also found that balancing your male 'royal blue taking action' and your female 'coral creative design and intuition' works best to get tangible results. 2017 was about establishing a solid foundation (royal blue) that felt organised, putting systems into place and then building upon those strategies to expand (coral) your client base, your services or products, and the area you serve with your business.

Technology will also have featured urging you to embrace a different approach to being visible, perhaps Podcasts, Videos or Social Media activities. If you acted on the gifts presented and you explored beyond your comfort zones and your wishes have started to manifest in 2017, you will during 2018 feel a rush of movement forward towards rapid growth and success.

If you resisted the growth and planning stages, kept small, played the victim of circumstance, was in judgment of any organisation or person, or still believed that others had power over you, 2018 which is a mastery year is going to be an interesting experience for you personally, spiritually and in your business.

This bottle relates to the star card in the Tarot which has always been the wish card. When you choose these colours you have somehow come to a place of grace and at this point you can wish with the full knowledge that your wishes will be fulfilled. This is a time for positive payback – all the good you have done is about to be returned tenfold. This bottle is always an indication of a change of status – a new way of describing yourself i.e. marriage, a new career, huge new possibilities.

2018 Spiritual and Material Conflict Year Red & Rose Pink

Building on from the gifts you embraced during 2017, you will find that 2018 brings you financial rewards, more stability and love for who you are and what you do. This is a great year to invest money in long-term projects, property, stocks and crypto currencies. You will study financial systems and ways to invest your hard-earned dosh! You will have to resist the urge to be distracted by shiny objects, that new car may have to wait while you instead channel your funds towards a long term financial gain. Investing in property is going to be a good idea for the months leading up to June. You may find your family or friends raising an eyebrow or two as you become interested in spiritual programs and pursue a personal development plan that incorporates studying the Law of Attraction.

You will be prodded to feel the judgments that sit in the red base chakra and embrace being a human that needs to do the red survival stuff on the planet while serving from your violet spiritual self. You will feel conflicted and judge what is spiritual and what is 'too' materialistic. Get over it fast! As this is a year of mastering that judgment that the red material world and its money systems are somehow not of God. You exist to experience *being* the creator on this planet; whether you create art, a meal, money, a baby, a business – ALL of it is an ACT of CREATION! And therefore everything is spiritual energy; everything you create is sacred. That is the "mastery initiation" you can expect in 2018.

This is a difficult vibration because it denotes confusion and a struggle. One often feels betrayed when this number comes up. Notice what blocks you from bringing heaven to earth and notice where you still betray yourself by not believing that you are the "I AM". These colours are all about bringing heaven to earth, the earth being the red, the lowest vibration where we hold onto what is REAL. Your health, money and relationships are all the real things in your life. This is the last bit of illusion that needs to be overcome so that you might see them as part of your spiritual journey and the way back to the Allness. This bottle indicates a lifetime as a nun or monk.

11 is a Master Magenta Year for Entrepreneurs

$$2+0+1+8 = 11$$

Deep Magenta & Clear White Light

Any area of your life that you still do not feel you are the master of, will rear its head during 2018 and give you the opportunity to work beyond illusions of not enough, powerlessness or victimhood. You will find yourself going into judgments, of yourself and others and play that game for a while. When you feel you get drained of energy or resources, you will be guided towards mentors or systems to help you step out of this funk caused by the depleting energy of judging.

You will see things either as dark or light, good or evil, right or wrong. In an 11 year you are asked to not make that choice, instead, see everything as perfection unfolding and both the light and the dark stitches are needed to create life and unique experiences on this planet of duality.

11's energy also brings in a portal or gateway opportunity, a path to choose that will influence the next 8 years of your life. You will seek ways to balance your human-ness with more of your spiritual self. That part of you that urges you to be authentic, genuine, loving and forgiving. For some, it will be an easy choice, as you will feel 'what have I got to lose by trying something new'. For others, who hit rock bottom in 2017, you have nothing else to lose, so try a new methodology to your life and work, only a fool repeats the journey again and again because it keeps applying the same tactics to the same problems.

A lack of unity and difficulty in making decisions as the two ones oppose. This is a master number and the hidden message is that it is our last look at issues of separation (think of the twin towers on 11th September). A difficult life path as we struggle to bring together the light and the dark. Look deeper. The dark is deep magenta, the colour related to Divine love and healing. Hidden in these colours are the answers to all issues of separation. This is where we finally let go of judgment of God who got us into the mess in the first place. When we get to the level of mastery that sees only perfection in the imperfection of our lives, the realisation comes that it was always perfect anyway and then we can fully step into the gift of being divinely loved.

Mini Global Forecast for 2018

Upheaval and survival, conflict and purging will occur, as the darker side of humanity has to be brought to the surface and into the light. We are in a time of shifting our consciousness from being about the self to being about the collective. The shift is from 3rd Dimensional to 5th Dimensional living.

In 3D we set up borders, systems that control, abuse authority, blame others, take retribution and care only about what affects us personally, sticking to our inherited or indoctrinated beliefs. However we started a paradigm shift in 2012 that is urging humanity to think beyond the individual and see the world from a higher view – as if from space – where you cannot see borders that were created on maps. We have wars because we try to protect or impose those control systems, borders and cultural beliefs. It will all get a shake up during 2018, leaders who still try to live by those rules, will be deposed and assassination of character and physical life attempts will be on the rise.

There will be a lot of speculation about predictions of a Third World War, will humanity sink into that destructive pattern or will they step into the light? Your opportunity to be a light on the planet will be crucial as these stories begin to play out – you can choose to also judge and be horrified – or you can choose to pray and hold your vision for a brighter future. *Where* you add your energy to the collective consciousness is going to be your mastery moment that will uplift you to a higher frequency or your moment where you fail the initiation and get bogged down by the fear and judgments.

The planet is also shifting her frequency and there will be increased seismic activity that started in 2011 with volcanoes, earthquakes and floods. Weather will continue to be a topic of conversation as technology is able to better predict hurricanes and severe weather systems.

More industries including the Fashion houses are going to be scrutinized in 2018 as the abuses of women gather momentum as the 'MeToo' campaigns expands beyond Hollywood. Women are finding their voices and will either chose to go into blame and retribution or forgiveness. These dramas are playing out, as they are part of the shift from masculine to the feminine energy on the planet. Women are facing a spiritual initiation, either to punish men for the atrocities they committed during the past cycle of male rule or to forgive and step into their own power and through that action demonstrate how to be a leader based on the power of love. It would be wise to remember that you only incarnate to experience the lesson because there was a judgment in place – you attract what you judge – you incarnate what you judged. So each life is an opportunity to shift out of judgment of what was felt to be an injustice, and choose to instead be in a space of love and forgiveness.

The self-help industry will undergo a revolution of its own, as those that serve under the guise of being a transformational leader will experience their client base shrinking. Using spiritual tools such as NLP to manipulate sales and income will begin to wane as the collective consciousness seeks a higher vibrational leader. The move towards authenticity and genuinely spiritually based mentors and thought leaders will be the new trend. There will still be the need for structure and systems, however the marketing strategies will evolve to reflect more of the spiritual teachings of: being in the now moment, following the flow, everything is perfect and letting go of control. Mostly what will be let go of in an 11 year is the need to feel you have to protect yourself or your business legally. That fear of 'something or someone will be out to get me or betray me' – you will have an opportunity to refuse to base your business plan on protectionism from perceived evil and instead to step into faith and trust.

Calculating Your Year Number Between 1 and 9, and master number 11, 22, 33

Day of birth + Month of birth + Current Year

$$13 + 09 + 2018$$

$$= 24$$

$$2 + 4 = 6$$

If your number ends in an 11, 22 or 33, you can also read the 2, 4 and 6 number information as additional guidance for the year.

Read the number that is your personal year number for guidance. The colour bottle and spritzer essence from the Colour Mirrors range is recommended to support you during the upcoming year.

You can look up each bottle's Colour Mirrors message on my website for further information. Go to:

[Bottles 1-9, 11, 22 & 33](#)

[Spritzer Essences Messages](#)

You can also enjoy a [FREE Angel Card Reading](#)

FREE signed copy of Moira's book [8 Colours of Prosperity](#) and pay only for shipping and handling.

Look up Moira's next [Love & Money Boot Camp](#) This course is especially powerful when you bring your partner with you to transform together and break free from the deeply embedded poverty habits that 97% of the population practice.

1 The Sun Yellow / Yellow

Master Your Ego

Supporting Essence: Power Yellow Gold

Health

Areas of sensitivity will be stomach and nerves. Important to have a healthy balanced diet, 'three meals a day' approach will benefit you. Lay off too much alcohol and drugs this year, they brain drain those bright ideas you will need to come up with this year as you begin a new cycle.

Wealth

You may find that you start 2018 with little or no cash flow, perhaps even a negative situation with debt or credit cards maxed out and feeling stressed about money. This is a good place to be in, it means that you now know for sure that the old ways of manifesting your money really do not work for you, and a new method of managing your cash flow and earning your income has to be a priority for you this year. Attend and study financial courses, investment courses and get to know how the Law of Attraction works for you. You will have a new financial beginning this year, *if* you let go of old beliefs that if you work harder or longer hours you earn more; instead find ways to make your money work for you. Look out for a passive income stream opportunity around nutrition and health.

Relationships

This is the year where you will crave independence and recognition for your abilities. Really needing others to see you as a leader and respect your opinion more. As you grow in your own power and confidence, remember that part of you mastering the 11 energy this year is; 'can I feel / act independent and achieve my goals while in a partnership, whether it is personal or business?' Try to not alienate support from others because you have that strong urge to 'go it alone'. You may have all the bright ideas, however you do not always have the knowledge needed to implement them for long-term gains. Enjoy your year of mental freedom from fear and the limitations that normally accompany the lower ego frequency. You will be braver to take on new concepts and projects.

Children in this year

Spend time with your child, support them with learning difficulties. If necessary get extra tuition or specialist teachers to aid them in retaining information and around exam time, puts lots of yellow around them.

COLOUR TIP: Use the **Power** Essence to de-stress when you feel overwhelmed by your to-do list.

2 The Moon Pale Blue / Royal Blue

Master Procrastination

Supporting Essence: Dolphin Royal Blue

Health

Ear, Nose and Throat are sensitive areas, when they flare up it will be a sign from the universe encouraging you to think before you speak more often. Be on the alert of what you speak, it becomes your reality. Uttering 'I have a sore toe' becomes a sore toe all year long.

Wealth

A good year to establish partnerships in business as well as delegating some work responsibilities to others, employ staff and invest in resources that will free you up to do what you do best. When you still try to do it all by yourself, you may become overwhelmed, drowning in commitments you cannot follow through on and your shadow side will have you go into resistance to move forward and it will lead to procrastination. Mentors will appear this year for you to learn from, note if you delay saying yes to their wisdom – bingo – that is exactly the opportunity you need to embrace to move forward. The opportunity you resist the most is where you will grow the most if you can get past the resistance. Look out for what may appear; odd courses, gifts of books, mentors, travelling opportunities, they are appearing in your space to show you the next steps to take. Watch your cash flow, it is a watery emotional year for money and spend consciously.

Relationships

High emotional feelings and demands on your time will be the norm from loved ones. Take time out to nurture your relationships and get in touch with your true feelings. When you experience being pulled from one pillar to the next, get into the present moment, take a deep breath and *feel* the feeling.

Children in this year

You need to let your child feel that they are really heard this year. Take time to chat to them individually and let them speak until they run out of steam! Listen - listen - listen. Swimming lessons and opportunities to get into the water will benefit their emotional stresses this year.

COLOUR TIP: Spray the **Dolphin** Essence when you feel fear or resistance to move forward.

3 Jupiter Coral / Coral

Master Expansion

Supporting Essence: Bliss Deep Orange

Health

In a 3 year you tend to be more sensitive around digestion issues, supplementing your diet with nutrients is essential to boost your immune system. It is a big year for you and your body will need all the support you can give it via your nutrition and exercise routines.

Wealth

This is your year for real expansion; plan bigger, aim higher, go beyond your limitations. Say yes to absolutely everything that lands in front of you and watch as magic begins to happen with how you manifest your reality. Everything you need to build on the vision you had for success will appear this year. It may not look like the blueprint you put into place for the last two years though, trust the process unfolding because a bigger blueprint is actually needed than what you thought you could build on. You may find you need bigger or new premises for home or work. Become visible in the biggest way you can – publish a book, video, social media, television, radio – try all of it. This year you will find that following your joy and love is the only way to stay sane and reap financial rewards.

Relationships

2018 is a great year to work on your sexual energy. This is a very physical year for you and the energy of love and joy in the 3 year will encourage you to enjoy your body and play more. Exercise with your partner, enjoy the outdoors, try some dance classes, join social groups. Being more social this year will also lead to new business opportunities. Party!

Children in this year

Encourage your child to enjoy more social activities, have friends over to visit and parties. Being a physical year, hug them a lot more! Encourage outdoor physical activities. Watch their nutrition.

COLOUR TIP: Use the **Bliss** essence to keep you focused on building your own empire and dis-engage from other people's dramas.

4 Uranus Yellow / Deep Turquoise
Master Shadow & Fears
Supporting Essence: Transcendence Silver Gold Dust

Health

A ping-pong year where you feel emotionally stressed one moment and suddenly mentally stressed the next. You may feel stuck with your health, like a bout of flu that won't go away – all health issues will be signals from your higher self to alert you to where you need to let go of control and go with the flow to get un-stuck.

Wealth

This is a year where your resistance to change, which resides in your shadow self, will undergo an initiation. Any fears that prevent you to do life differently will be highlighted, giving you the opportunity to review your shadow habits and make the decision to change. The #DID – Do it Differently is going to become your mantra. If you resist change, the electrifying charge of a 4 Uranus planet of lightning in an 11 master year will be felt as sudden change where you will have no option but to embrace something radically new in your life and business. The more you resist change that your Higher Self says is your new beginning, the more your cash flow will stagnate. When you do decide to stop controlling and go with the flow, you will be riding a wave so surprising and so spectacular that you will be annoyed with yourself that you held on to the past for so long. This year your inner wounded child will need transformation, therapy sessions are recommended to dig deep into the sub-conscious and do the healing work.

Relationships

A tendency to go underground with your feelings and to not tell others how you truly feel is a theme in a 4 year. Not a healthy option! Notice where you clam up and hold grudges because you felt misunderstood or not valued enough, that is an old game and it is your time to say how you feel.

Children in this year

Put on extra night-lights and avoid scary movies. This year is a sensitive year to 'things that go bump in the night'. Encourage your child to say how they feel in the moment to avoid those moods and doors slamming.

COLOUR TIP: Use the **Transcendence** essence to help you choose a path of light positive energy instead of the darker retaliation side of yourself to respond to issues this year.

5 Mercury Green / Pale Green
Master Public Speaking
Supporting Essence: Archangel Metatron Magenta

Health

The 5 green year focuses on the parts of the body around the heart and lungs. So a good year to get that check-up and full physical examination by your doctor.

Wealth

This year the seeds you planted in your money garden will begin to pop up as increased cash flow and further opportunities to re-invest or diversify your financial portfolio for long term harvesting. Your business plan will expand and mentors will show you where you need to tweak and adjust so that you can ensure you work the least hours for the most value. Balancing work and play will be important this year. Re-fresh your business and marketing plans, your physical spaces, tidy the office and de-clutter. You will feel the urge to move home, buy new furniture or new equipment to support you in your business. Networking is important this year, speak up and communicate at every opportunity presented and share your ideas and message. If you have a fear of public speaking, this is the year to master that by attending courses and getting the help of mentors. Get in front of a camera, speak to the audience that has been waiting to hear your story and be inspired by the journey of transformation that you have personally taken.

Relationships

This is a good year to set new healthier boundaries to your time and space within relationships. Ensure you have space to work in and another space for playing in. Spend quality time away from work to focus on nurturing your personal relationships. A fun trip together will help to re-fresh the romance, or build team spirit if it is a business relationship that needs reviving.

Children in this year

Quality time with each individual child is recommended to ensure they feel validated and of independent significance. Avoid 'grouping' them together in too many activities. A good year to move children to their own rooms or set aside a sanctuary space for them to retreat to.

COLOUR TIP: Spray the **Metatron** essence to help you stay centred in what is going to be a busy year. Especially useful to spray and breathe in your 'I Am-ness' before public speaking so that what you say is authentic.

6 Venus Pink / Pink

Master Law of Attraction

Supporting Essence: Pink Angel

Health

A good year for health, follow your fitness routine, yoga, swimming or whatever keeps you nimble and healthy. If you have not yet invested in time to look after your body, start with low-impact exercises and strengthen your spine first.

Wealth

To manifest this year, think it into being. Work at improving your ability to love, forgive and accept – that increase in positive personal frequency means that whatever you can think of coming into your life, can be attracted to your magnetic force field. *Who you are* versus *what you do* is a much more powerful way to manifest what you desire in a 6 year. Working consciously with the energies of the law of attraction this year will promise an exciting time to research, test and play with methods of manifestation that work for you. To get started, focus on attracting more love towards yourself by being kinder and more loving towards your body, nurture and care for yourself as if you are the most precious being on the planet. The more the universe sees you appreciating and valuing yourself, the more value it will send to you.

Relationships

The tendency in a 6 year is to seek out romance or actively find that soul mate, the yearning to no longer be alone or to evolve your current relationship will be a desire. However it is also an 11 master year, so if your tactic is to force the issue of finding a mate, or trying to get one to change, you will find it a struggle. The Venus planet of love energy is very clear – love yourself first and let that self-love frequency automatically attract the matching frequency in a partner. A soul mate is God's work, not yours to control and manipulate into arriving into your life. Validate your existence as precious perfect, and love will flow towards you as well as the love of your life.

Children in this year

I love you I love you I love you – repeat many times and reassure your child that you love them unconditionally. They may appear needy this year for that extra bit of attention and validation of their value in your life.

COLOUR TIP: Use the **Pink Angel** essence to open doors of love and prosperity, and to instantly put you in a space of unconditional love for yourself.

7 Neptune Turquoise / Deep Turquoise

Master Teacher Trainer

Supporting Essence: Turquoise Dragon

Health

In a 7 year, you have the opportunity to become more spiritual and raise your vibration and your body will feel the shifting energy as a purging or cleansing process. Pay attention to your thyroid and hormones as you begin to be more in faith and less in fear. Your body is learning to follow your new beliefs and relax more on issues that would previously cause stress.

Wealth

You will learn this year how to allow money to manifest spiritually using the Law of Attraction and how you can ease up on all the hours of work you have thought you needed to put in to get the income result you need. This year you stop being a follower and become a leader in your field. You will gain clarity on the direction you wish to take your business and life towards, call in the help of mentors to guide you to develop packages that you can sell in your business. Keep it simple this year, focus on one business or project only and master that one first. Say yes to opportunities to teach what you have already mastered and stay in deep trust that you are already qualified enough and know enough. Embrace technology this year, let videos and social media support your new business venture to reach a wider audience. This is a good year to start writing your book.

Relationships

Your personal relationships may take a back seat this year as you focus all your energy towards your business plan, research, networking and building business relationships instead.

Children in this year

It may be a year of tears and tantrums as your child learns about having deeper feelings and how to express their emotions. Reassure them that all the feelings they experience are valid and normal.

COLOUR TIP: Spray the sparkly **Turquoise Dragon** to help you stay focussed on your future aspirations, especially if you feel yourself in doubt about the pathway unfolding for you this year. Keep the Faith!

8 Saturn Pale Violet / Deep Violet
Master Prosperity
Supporting Essence: Soul Magenta Violet

Health

Issues that stress may cause you to have headaches, your mind may be filled with so many options and possibilities that you feel mentally overwhelmed with it all. Take time to meditate, do deep breathing and zone out from thinking about work. You may become depressed and trigger eating disorders because you are not quite where you thought you would be at this stage of your life; remember that God's timing for you is not always going to be the same schedule you follow.

Wealth

Establishing systems that flow effortlessly in your business is important. Automate as much as possible and delegate where you can. 8 is the infinity symbol and shows us that giving and receiving needs to be in equal balance for flow to happen. The law of attraction teaches that even when you are down to your last dollar, the act of giving that dollar activates the law to bring that dollar back towards you – the law seeks ways to balance everything. Often doing the opposite of what you think you should be doing will set the wheel of fortune in motion to deliver you prosperity. So instead of finding ways to earn more money, find ways to have more fun or opportunities to love someone – the energy of love and fun will result in money coming in.

Relationships

You may have a tendency to retreat from intimate relationships, after all the colour violet is about nuns and monks and celibacy and chastity. You will master this year how to be spiritual, of service and making a difference in your community while at the same time not having to make any sacrifices to your love life to achieve the level of success you desire.

Children in this year

Start teaching money principles to your child. Financial awareness will help your child understand and master the art of working with the law of attraction from an early age. Help them to design a vision board focussing on the type of activities, friends and study results they want to achieve.

COLOUR TIP: The **Soul** essence will help you stay aligned with your higher power and make you feel that God is truly on your side this year.

9 Mars Red / Orange

Master Relationships

Supporting Essence: Green Angel

Health

Keep your hips and spine subtle this year, walking and fresh air is the best exercise to stop your body from hoarding unexpressed angry feelings. If you still have unresolved emotional trauma, speak to a therapist and purge those toxins from your liver using essential oils and essences or sound therapy.

Wealth

This is an easy year to manifest money and follow the passion that drives you to do what you do. All the resources, energy and creativity you need to follow through on commitments and complete projects will appear without needing you to put too much effort in. The only time your flow will cease is when your angry emotions get the better of you. People from the past will pop up unexpectedly, sometimes to reflect to you how far you have evolved or sometimes to remind you where the healing is still needed for you to end this cycle of 9 years. You will be able to discern between going to war energy to fight things right in your life, or simply to step back and love it anyway. Disengaging from dramas created by you or others will be easier this year as you lighten your load and clear spaces in your heart for new love and new beginnings to enter.

Relationships

Commit to resolve the issues you have in your partnerships or marriages. Engage a professional advisor to help you navigate the breakdowns in communication and build a new rosy vision for your future together.

Children in this year

Encourage sports and any physical activity this year. Spend time with your child on creative projects and help them finish each one and allow them to feel the satisfaction of seeing a completed job.

COLOUR TIP: The complementary colour to red is green and the **Green Angel** essence is the perfect antidote for cooling down that hot little devil on your shoulder that tries to sabotage your love life.

11 Duality Deep Magenta / Clear Master Wounded Healer Supporting Essence: Clear Angel

Health

If you have not paid attention to your health, this year will be a wake-up call. Sort out your eating disorders; get help from nutritionists and physical fitness experts. A tendency to become depressed may surface this year, all depression is anger that has been suppressed, so this year is a good year to seek out spiritual counselling for those deeply buried issues.

Wealth

If your personal number is 11 in an 11 year, you face a double whammy of master energy coming at you from all directions. It is a very powerful year where you have to do an about turn – everything you have believed in or built foundations around, will be given the opportunity to reform 360 degrees. This is transformation at the deepest level. Beginning to think, believe and feel differently about many aspects of your life. What have you been avoiding dealing with? Is it your marriage, your debt, your weight, your career or your addictions? 2018 it can all transform, all you have to do is to step out of judgment of the person or yourself for the mess you see. When you stop judging 'it' as bad or wrong, and instead choose to let go, the grip of being stuck and struggling will cease to exist. Seek freedom from fear this year, seek freedom from judging this year – when you do – you will fly!

Relationships

Do I stay or do I go? Separation energy may pop up and you will entertain the idea of leaving a long term personal or business relationship. On the other hand, if you have always been solo, this may be the year that the perfect partner lands in your space and you will need to assess your fears around dependency and commitment issues.

Children in this year

Keep an eye out for signs of depression and allow some healthy time for retreating and 'alone time' and balance that with enticing fun activities that get them out of the room or away from the devices. If moodiness persists, bring in a favourite aunt or friend to encourage them to talk about their feelings with someone other than you – because chances are it is you they are upset with.

COLOUR TIP: The supporting essence of **Clear Angel** will help you see the light clearly when things begin to appear dark around you, or you get confused or you are tempted to go back into judgments.

22 Forgiveness Deep Magenta / Magenta

Master Self Judgment

Supporting Essence: Lilac Dragon

Health

This is a good healthy year for your physical body. The only area to be on the alert for may be emotional suppression and over analysing situations. Ease up on yourself; you are already perfect and appreciated by everyone.

Wealth

Take stock of your business or career. Are you really happy? Doing what you love? In bliss? Or, are you still just ticking along and settling for mundane? Do you have financial freedom yet? Or do you still live from month to month and survival is your driving force that keeps you working the same patterns around generating love and money? These are key questions that are needed to assess your life at this crucial stage of self-mastery. If any part of your life is not in harmony, this year is your power year to flip it all around and step into grace. It can happen in a blink of an eye, if only you give permission for the change to occur. Huge angels are standing by to help you make the shift you desire. Everything that happens during this year will become a tool for you to use to help others transform their issues. Keep a journal and write that book.

Relationships

A feeling of comfort and having settled in tends to be around relationships, which is exactly the time when you need to be on the alert for stagnating the energy between your partnerships. Spend time reviving and rejuvenating partnerships at home and at work. Build on those relationships because there is more to benefit from in the future by taking the time now to connect more often and more sincerely.

Children in this year

Your child will want their independence and be left alone to forge a path of their own this year. Give them the space they crave to think for them self and to solve their problems. If they get stuck, they will approach you for help on their own time.

COLOUR TIP: For support where you have avoided taking action, spray the **Lilac Dragon** and set off a crystal bomb to instantly clear the path towards deep transformation.

33 Love & Magic Pale Pink / Rose Pink Self Mastery Supporting Essence: Yeshua Pale Gold

Health

Natural health remedies and alternative therapies will support you with any issues this year, whatever feels comfortable and easy to pursue and attain your goal towards holistic health.

Wealth

A warm gentle year where you feel at peace with what you have achieved and realise that you have always had enough, enough love and enough money. Your faith in a force that is beyond your perceived human smallness has resulted in you manifesting exactly what you need each and every moment. For you there is now only a spiritual way of manifesting your dreams. You have mastered the life experience of letting go of control and instead stepped into the natural rhythm that is the heart beat of this planet. This year travel to exotic places and be in spaces on the planet that are sacred and beautiful. Enjoy and celebrate life. Whether you go camping with a tent on a sandy shore or chose to sail the oceans in a yacht – get out there and breathe in the life force that you know now, is within you and creates everything effortlessly. You are the master magician.

Relationships

Romance is in the air, enjoy the lighter side of partnerships at home and at work, express gratitude to the people who made it possible for you to succeed.

Children in this year

Your child will play with falling in love, maybe for the first time. It may be another person or even a new pet. Just enjoy the feeling of watching that first spark of love lighting up their eyes!

COLOUR TIP: Spray the **Yeshua** bottle to instantly put you in a space of love and grace. In that space you are a master and can achieve anything.
